

Front-End Developer / Analytical chemist

Katarzyna Lubecka

The time for change has come for me. I decided to turn a hobby into a job where I can develop not only analytical skills but also creativity. I really enjoy designing and coding web applications and would like to become a FRONT-END DEVELOPER in the near future. I create modern and SEO-optimized websites with a mobile first approach. I am a hard-working and well-organized person. I love learning new things. Working under time pressure is no stranger to me - I know exactly what deadline and ASAP mean. I invite you to take a look at my portfolio. If you specialize in backend and would like to start joint projects or just want to help me spread my wings as a Front-end developer then feel free to contact me! My github account: <https://github.com/aurorahill>
